Requirements: (Please initial the following)

_____ I understand that surface discharge systems, to waters of the state, require effluent sampling and that a Notice of Intent for a NPDES Permit shall be completed and submitted to the DNR. Frequency of sampling depends on the type of system installed.

_____ I understand some systems also require maintenance agreements. It is currently the homeowner's responsibility to see that their systems are sampled and that maintenance agreement is in current and recorded.

_____ Soil Analysis or Percolation Test Result (Required for Absorption Systems): A copy of the soil analysis or percolation test showing the location, depth, results of each hole, and required footage shall accompany this application, if laterals are planned.

_____ I certify that the information provided on this application is correct and that all work will be completed in accordance with the Board of Health Rules and Regulations. **The County does not represent nor warrant the operation or proper functioning of any system for any period of time.**
